1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Garth Dahlen on 5/25/04.

Amend the claims as follows:

Cancel claims 6-7.

2. Newly submitted claims 6-7 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons:

A. Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1-5, which were originally presented, drawn to emulsions, classified in class 524, subclass 501.
- II. Claims 6-7, newly presented, drawn to coated paper, classified in class 428, subclass 507

The inventions are distinct, each from the other because:

Inventions of group I and group II are related as mutually exclusive species in an intermediate-final product relationship. Distinctness is proven for claims in this relationship if the intermediate product is useful to make other than the final product (MPEP § 806.04(b), 3rd paragraph), and the species are patentably distinct (MPEP § 806.04(h)). In the instant case, the intermediate product is deemed to be useful as

coating a substrate other than paper and the inventions are deemed patentably distinct since there is nothing on this record to show them to be obvious variants. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions anticipated by the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 6-7 would have been withdrawn from consideration as being directed to a non-elected invention had they not been cancelled to place this application in condition for allowance. See 37 CFR 1.142(b) and MPEP § 821.03.

The examiner has written these elements related to restriction for the express purpose of maintaining the applicant's rights when such restriction requirements are made.
